Hello! I've been a professional Director of Photography since I graduated from Chapman University in 2003. I've worked for major companies that entrusted me with enormous brands as well as low-budgets. I've shot on film and digital of all types and have used RED cameras in 4K+ resolutions since 2007. I own a Red "Weapon" 8K Helium. My work has been featured on movie screens, network television, film festivals, and of course the web. Contact me if you have any questions. I look forward to working with you!
